Congressman Doug LaMalfa
2885 Churn Creek Road Suite C
Redding, CA 96002

Dear Congressman LaMalfa,

Shasta County strongly opposes the American Health Care Act (AHCA). California is a state of nearly 40 million people and counties care for up to one third of Californians. If enacted, the bill would shift tens of billions of dollars in costs to counties and reverse the significant progress our state has made in providing health care coverage to millions of our residents.

Among our numerous concerns are the following:

- The legislation institutes a number of administrative changes to Medicaid that would make it more difficult to maintain health coverage;
- The AHCA eliminates the enhanced federal match California uses to ensure persons with disabilities and older Americans are able to stay in their homes with In-Home Supportive Services (IHSS); and,
- The bill ends the \$90 million a year the state has received under the Prevention and Public Health Fund, which is used by local health departments to invest in public health prevention activities protecting all Californians.

Since the enactment of the Affordable Care Act, the state's uninsured rate has been cut by nearly two-thirds, to 7.1 percent, according to the Centers for Disease Control and Prevention. The Congressional Budget Office (CBO) estimate confirms our deep concern that the bill would seriously harm the residents of our state. According to CBO, over the next ten years:

- 14 million fewer individuals would be insured through Medicaid, a reduction of roughly 17 percent relative to the number projected under current law;
- Federal contributions to Medicaid would be cut by 25 percent (\$880 billion);
- The national safety net of public hospitals and health systems, including county systems, would be under further stress with 14 million more people uninsured next year, rising to 24 million by 2026; and

Congressman Doug LaMalfa

- Providing states with the options to select a Medicaid block grant and/or require work for coverage would shift even more costs to states and increase the uninsured rate.

Finally, the recently proposed MacArthur Amendment permits states to allow insurers to sell plans that do not contain all ten of the Essential Health Benefits required of ACA plans, which include maternity care, substance use and mental health treatment, and prescription drugs. The amendment also allows states to approve insurance plans to charge higher premiums for persons with chronic and costly conditions such as cancer, which may lead to states creating high risk pools partially funded by the federal government to help pay for sicker individuals. These pools, however, have been woefully underfunded in the past and California's counties are concerned that these changes will negatively impact access to care for individuals with preexisting conditions. For these reasons, we urge you to vote 'no' on the American Health Care Act.

Sincerely,

David A. Kehoe, Chairman
Board of Supervisors
County of Shasta
