CLERK OF THE BOARD

Subject: CSA # Jones Valley Acct # 0006535,
Water usage penalty.

I am 74 yrs, and my wife 71. We live on social security. I am disabled. I am recovering from colon cancer, heart problems, pacemaker surgery, and many other health problems.

We have lived in Shasta Co. all of our lives, and have watched prices skyrocket. Our property taxes have risen to \$300 a month. Gas tax and state tax also up. People voted to not raise the price of water because no one can afford any more money coming out of their small checks.

We have (like many other seniors that live in the country) fruit and nut trees. We depend on these to make it through the year. By canning these fruits and vegetables it saves us money that we don't have. We have placed timers on our trees and garden at 15 min. We also have animals, and children that come over often to help us out. They often spend the night and shower.

What you people need To do for all the people is reduce the price.

It really seems as though the adopted ordinance # 719 was out of revenge.

The right thing to do is lower prices for all the people - not force extra hardships on them - Then everyone will love you, At the very least, only charge people for the extra water they use.

This is the right thing To do.

Thank you,

Jerry W. Seaborn
Shirley Seaborn
