

THIRD PARTY REQUEST TO USE PG&E REAL PROPERTY

READ THE FOLLOWING BEFORE COMPLETING AND SUBMITTING THIS FORM: PG&E occasionally allows the use of its real property by a third party when the proposed use meets certain criteria, including non-interference with PG&E's utility operations and facilities, and non-endangerment to persons, property, and the environment. PG&E may, at its sole and absolute discretion, consider other factors in evaluating a request for such use, including whether any benefit to PG&E or to the local community may be provided by allowing the use. PG&E charges a non-refundable administrative fee of \$1000 for evaluating and processing a request for use of its real property, and will not process a request until this completed form and the administrative fee is received by PG&E. Depending on the nature and complexity of the proposed use, PG&E may require the additional submittal of a formal Work Plan and/or Health and Safety plan detailing the proposed activities on PG&E's land. Absent a request for such information, this completed form will serve as the Work Plan for the proposed use. The form of instrument used to authorize any use of PG&E's land (e.g. license, lease, or grant of easement) will be determined by PG&E in its sole and absolute discretion. If PG&E determines that the instrument to be used is a Grant of Easement, the requesting party will be required to provide a legal description and map of the proposed easement area, signed and stamped by a surveyor licensed in the State of California, and also an offer of consideration, supported by an appraisal prepared by a certified appraiser. In some circumstances, including for any grant of easement, PG&E is required to obtain the permission of the California Public Utility Commission (CPUC) before allowing the use, in which case, the processing time and cost may be significantly increased. If PG&E determines your use requires the approval of the CPUC, PG&E will advise you accordingly. Provision of this request by PG&E to any third party is in no way intended to be an offer to use PG&E's land, and PG&E makes no representation or warranty that submission of your request to PG&E will lead to permission to use PG&E's real property. PG&E has the right to cease consideration of your request at any time for any reason prior to the execution and delivery of a written agreement by both parties. **By signing and submitting this request form to PG&E, you hereby acknowledge and agree to these terms.**

Shasta County Public Works			
Legal status of Requestor (e.g. California corporation, individual dba [Business Name], individual, public body of the state of California, etc.)			

LOCATION OF PG&E REAL PROPERTY WHICH REQUESTOR DESIRES TO USE

(Be as complete as possible, i.e. city, county, street, cross-street, assessor's parcel no., township, range, section, location sketch)

APN: 021200032. On Big Bend Road approximately 12.3 miles north of State Highway 299.

DETAILED DESCRIPTION OF PROPOSED USE OF PG&E'S REAL PROPERTY

(Be as complete as possible. As applicable, include the time frame for the proposed use, number of people/animals as well as any employees or contractors, a description of crops proposed, vehicular use, and a description of any personal property to be brought onto the property or structures to be erected, including fencing. Also, include existing improvements and condition of the area to be used.)

California storm events in early 2017 caused a slide along Big Bend Road at the location described herein. The traveled way has been reduced on Big Bend Road at the slide leaving only one lane open to traffic using two way traffic control, this affects both residents in the communities beyond the slide as well as PG&E sites. Under the Federal Highway Administration's (FHWA)

Emergency Relief (ER) Program the County must proceed under standard procedures for the permanent restoration of the roadway since access past the slide is available. These procedures require us to obtain environmental clearance before construction can begin. The County needs use of this PG&E property to allow our environmental consultant access to the site as they need to complete various studies and research to obtain proper CEQA/NEPA documentation. As well as the environmental studies, the County has a geotechnical consultant that will conduct 5 soil borings to provide vital information to complete final design of the slide repair. It is likely that only 2 of the bore locations will be outside the County right-of-way on PG&E property. The environmental consultant will have minimal impact to the property with only a few people on site at any one time and likely no equipment. The geotechnical consultant will have a larger impact with the need to access certain locations to perform the boring operations. The geotechnical consultant will use subcontractors for the drilling and access to the site. The drilling will be done using a truck mounted drill and access will be provided by use of loader, excavator, or dozer or a combination thereof. Very little natural land will be disturbed to obtain access, most of the area needed has been disturbed by the slide itself and this work will mostly consist of moving slide debris. All consultants and operations will access the property using Big Bend Road.

CLEARLY DESCRIBE ANY FACILITIES PROPOSED TO BE INSTALLED ON PG&E'S REAL PROPERTY

(type, size, number, measurements, materials, include plan/profile drawings)

Depending on the conditions the geotechnical consultant discovers during the soil borings it may be necessary to leave behind some temporary instrumentation to further monitor movement of the slide and ground water. If called for by the geotechnical consultant an inclinometer and monitoring well may be installed in the 2 bore locations on PG&E's property. The 1.5" monitoring well, if installed, will be located roughly 150-200' north of Big Bend Road onto PG&E property at the slide. The slope inclinometer casing, if needed, would be installed roughly 50' north of Big Bend Road onto PG&E property.

DESCRIBE THE PROPERTY'S CULTURAL AND ENVIRONMENTAL RESOURCES

(% wooded, vacant land, wetlands, creeks, waterways etc.):

The County's environmental consultant will fully evaluate the area to obtain proper CEQ/NEPA documentation for construction of the slide repair. This area is potentially ancestral territory of the Madesi Band of the Pit River Tribe. A cursory review of the area of the property the county will need access to shows it is a wooded vacant area with no wetlands, creeks, or waterways.

DESCRIBE ANY POTENTIAL ECONOMIC, SOCIAL OR POLITICAL ISSUES OF CONTENTION

(e.g., project funding issues, scheduling, environmental liabilities):

The main issue for the project would be if further damage is sustained to the road jeopardizing the remaining traveled way. Completing these studies will help move the project forward closer to final repair of the slide and road.

WILL PG&E NEED TO MAKE ANY PHYSICAL CHANGES TO THE REAL PROPERTY OR FACILITIES TO ACCOMMODATE THIS REQUEST (I.E., SOIL EXCAVATIONS, INCREASE/DECREASE OF GRADE)?

☐ YES. DESCRIBE BELOW ☒ NO

No. The geotechnical consultant will have a subcontractor to provide access to the drill sites.

LIST AND ATTACH FEDERAL, STATE, AND LOCAL PERMITS GRANTED OR APPLIED FOR. IF DOCUMENTS ARE NOT YET AVAILABLE, LIST DATES OF AVAILABILITY AND CONTACT INFO.

Permits from any agency for final construction of the project will be determined during the environmental phase of the project. At this time it is unknown if there will be any required.

SCHEDULE FOR PROCESS:

Requestor needs transactional document by (Date): 5/14/18

Note: Date should include contingency for obtaining CPUC approval of requestor's proposed use in the event PG&E determines such regulatory approval is required.

Reason(s) for completion and approval timeline. If the request for proposed use is part of a larger project, describe how obtaining use of PG&E's real property fits into the overall project schedule. If contingency for obtaining CPUC approval is not realistic, explain why request for proposed use was not completed earlier or in a timely manner and why expedited treatment may be required.

SUBMIT THIS REQUEST ALONG WITH A CHECK PAYABLE TO PG&E IN THE AMOUNT OF \$1000, TO:

Pacific Gas and Electric Company

Attn: Ryan Revheim

3600 Meadow View Drive

Redding, CA 96002

Call Ryan Revheim at 530.246.6532 if you have any questions.
